DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Claims 1-5 are objected to because of the following informalities:

On page 9, line 4, "and being characterized that", should be changed to read, - - comprising: - -.

On page 9, line 5, "of a fan" should be changed to read, - - of the fan - -.

On page 9, line 6, "locating of a flexible ring" should be changed to read, - - locating notches of the flexible ring - -.

On page 9, line 7, "an accommodating ring" should be changed to read, - - the accommodating ring - -.

On page 9, line 9, "are fastened with a locating plate by means of screws" should be changed to read, - - is fastened with the locating plate to a power supply by means of screws - -.

On page 9, line 10, "a side panel" should be changed to read, - - the side panel -

On page 9, lines 13-14, "fixed the locating plate to the interior of the equipment" should be changed to read, - - fixed the locating plate to the interior of the chassis - -...

On page 9, line 16, "a power supply" should be changed to read, - - the power supply - -.

On page 10, line 6, "to have dimensions same" should be changed to read, - - to have dimensions the same - -.

Application/Control Number: 10/823,671

Art Unit: 2835

On page 10, line 15, "in an interior of computer, electronic and electromechanical products." should be changed to read - - in an interior of the computer. - -.

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

With respect to claim 1, the allowability resides in the overall structure of the device as recited in independent claim 1 and at least in part because **the proposed amendment to claim 1 recites**, "the locating assembly is fastened with a locating plate to a power supply by means of screws".

The aforementioned limitations in combination with all remaining limitations of claim 1 are believed to render said claim 1 and all claims dependent therefrom patentable over the art of record.

The closest reference to the present invention is believed to be US 6,567,267 to Wang.

Wang disclosed in Figs 1-2, a chassis (9) comprising a side panel (adjacent 44), a locating plate (42) a locating assembly (4), a fan (72) a flexible ring (8) and an accommodating ring (between 8 and 70), a power supply (Column 2, Lines 61-64), and

Application/Control Number: 10/823,671

Art Unit: 2835

screws (10), but fails to teach, <u>as proposed above</u>, that "the locating assembly is fastened with the locating plate to a power supply by means of screws".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2005/0201056; US 6,930,882; US 6,587,335; US 2005/0174732; US 2004/0095723; US 20050073812; US 2004/0196629; US 6,145,586; US 6,125,924; US 6,791,837 all further teach air guides.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zachary M. Pape whose telephone number is 571-272-2201. The examiner can normally be reached on Mon. - Thur. & every other Fri. (8:00am - 5:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild can be reached at 571-272-2092. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
